

Civil Disobedients

Capdown

We're sick of life this way when the ideas on which it's based are so untrue
We address things you say but then you've never got the guts to follow through

We will take you on

We will unite to be strong

And then we're comin' after you Watch out for the civil disobedients Welcome to the world of the civil
disobedients

You've made your choice now it's time to face the consequence

Welcome to the world of the civil disobedients

We're about to attack so you better plan your defence
