# 7 Flies

## 1000mods

i feel there's something wrong
i look up high in the sky
i'm afraid to be alone
no reason why i crynobody's waiting me
the stars are falling in the streets
it's to dark but i can see
i spin around aroundi see the seven flies
i see the seven flies
i see the seven flies to low for mebut no one saves my friend
no god exists in the end
no thoughts an no regrets
we got to rise to riseso far I've got to try
i see the clouds in your eye
i need to move from here
i got to ride to ridei see the seven flies
i see the seven flies
i see the seven flies to low for me one more time one more timeso now i'm on my self
i feel i'm out in the sky
i don't want to be alone
i need to try to tryI've done with all these things
i want to escape from this
i want to set me free
i got to be to bei see the seven flies
i see the seven flies
i see the seven flies to low for me to low for me one more time
