Love Is Still Alive

Bosson

Our love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still alive
You say that our love is gone and
Whatever we did was wrong and
That everything we built is now history, yeah
You've taken my heart away and
I can't seem to make you stay but baby, I believe
Our love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still alive
I've given it all to you and
I've been living my life through you and
I'm not gonna give in now, we've come too far
That we're gonna work it out
And even if you still doubt it, baby, I believe
Our love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still alive
Love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still alive
Believe me, things will get better
Hold me, I'm more than a friend
Trust me, I promise you one thing
I'll stay with you till the end
Our love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby, our love, our love is still alive

Love is still alive
And all I want is just to be right by your side
And all I'm asking you is give me one more try
I know the future has a place for you and I
'Cause baby our love, our love is still alive
Love is still, still alive
And all I want is just to be by your side
And all I'm asking you is to give me one
Just give one, one more try
I know that the future has a place for you and I
'Cause baby our love, our love is still
Our love is still, still alive
Our love is still, still alive
And all I want is just to be by your side
And all I'm asking you is to give me one
Just give one, one more try
