

Know The Difference

Inxs

You're driving all over town
In your big car
Windows down
Your sweet perfume trails behind
The impression, it's in my mind
It's crazy, how much I ache?
For the moments we could make
Your girlfriends, they like to talk
Yea, they told me about your boy
What you do and what you say?
An' do you know the difference anyway?
Could I show you what's in store?
Yes, I know you'll be wanting more
You're the kind of girl who knows
What you want and where it goes?
You got instinct
You got class
Why don't you leave that guy on his ass?
Good intentions are not enough
We should join hands and rise above
What you do and what you say?
And do you know the difference any way?
What you do and what you say?
And do you know the difference any way?
What you do and what you say?
And do you know the difference any way?
What you do and what you say?
And do you know the difference any way?
It's crazy, how much I ache?
For the moments we could take
Your girlfriends, they like to, aah
Yea, they told me about your boy
Your driving all over town
In your big car
Windows down
Your sweet perfume trails behind
Impression, it's in my mind
What you do and what you say?
And do you know the difference any way?

What you do and what you say?
And do you know the difference any way?
Yea
