

# Algorithm

## Emmy the Great

You, you...

You, you...I've got to find a place for the love I have within

Pumping through my heart like an algorithm

Showing me the way in this world we live in

Pumping through my heart, it's an algorithmI hope it leads me to you, you...

You, you...I've got to find a place for the love I have within

Pumping through my heart like an algorithm

Showing me the way in this world we live in

Pumping through my brain, it's an algorithm

I hope it leads me to you, you...

You, you...Pumping through my heart, pumping through my heart

Got to find a place, got to find a place, oooh

Talk to me like you're walking me home

Tell me something that nobody knows

The noise can only get louder

(Keeps getting louder)

But this could be the day

It just keeps coming around

(You, you, you, you)I hope it leads me to you, you...

You, you...(You, you, you, you)
