Redefine

SOiL

(First sight)

Turns me around again

Brings me face to face with my sin

I've got it, always had it

A reason to look within now(Take flight)

To your sun again

Burns the sin straight from my hands

I've got it, always had it

A reason to live within nowEvery time I fall you catch me

And every time I lose control

You help me, you save me

And every time I lose myself

You find me, redefine me(My God)

How stained my hands have been

Makes me sick from inside out again

I've got it, always had it

A reason to look within now(Stand close)

To my side again

Never stuck a knife in my back, friend

I've got it, always had it

A reason to live within nowEvery time I fall you catch me

And every time I lose control

You help me, you save me

And every time I lose myself

You find me, redefine meSomebody to make me feel whole again

(My life gets better)

Somebody to make me wanna love again

(My life gets better)Somebody to make me see the sun again

(My life gets better)

Somebody to hold me, hold me

Until this life feels better

Every time I fallAnd every time I lose control

You help me, you save me

And every time I lose myself

You find me, redefine meAnd every time I hate myself

You love me, forgive me

And every time I lose myself

You find me, redefine me
