Dance Your Life Away

Ufo

In a dance band competition fox-trotting with my girl
Dance, dance, dance all night, dance your life away
High geared razzle dazzle, recession is the trouble
Dance, dance, dance all night, dance your life away
Thirty hours on the floor and twenty partners left
Dance, dance, dance all night, dance your life away
Feel so tired it must be a week, nearly on my knees
Dance, dance, dance all night, dance your life away
California, you always seem to have the sun
But I never really got near to it
And you try your hand at anything you know

Just to try and earn a dollar
In a dance band competition fox-trotting with my girl
Dance, dance, dance all night, dance your life away
High geared razzle dazzle, recession is the trouble
Dance, dance, dance all night, dance your life away
California, you always seem to have the sun
But I never really got near to it
And you try your hand at anything you know
Just to try and earn a dollar
