Billion Lights

Jls

It feels so beautiful baby, and that's alright
We live on miracles, we dance tonight
So why don't you touch me? So why?
So I can feel that connection
Don't be afraid of getting high
'Cause up is the only directionIt's time to let them know
Can't hold it in no more
It's burning deep inside and I got to let it go
They tell us turn it down, we're never growing up
Forever living young, the world
Come on and get itWe ignite the sky (come on and get it)
A billion lights tonight (come on and get it)
Flashing in your eyes (come on and get it)
A squad might start a fire (come on and get it)
A million miles an hour (come on and get it)
And they can't stop the power (come on and get it)We ignite the sky (come on and get it)
A billion lights tonight (come on and get it)It's just that freedom we're tasting
No drink, no peels
Don't mind that rock 'cause we're making
We're living for the thrill
So why don't you touch me? So why?
So I can feel that connection
Don't be afraid of getting high
'Cause up is the only directionIt's time to let them know
Can't hold it in no more
It's burning deep inside and we got to let it go
They tell us turn it down, we're never growing up
Forever living young, the world
Come on and get itWe ignite the sky (come on and get it)
A billion lights tonight (come on and get it)
Flashing in your eyes (come on and get it)
A squad might start a fire (come on and get it)
A million miles an hour (come on and get it)
And they can't stop the power (come on and get it)We ignite the sky (come on and get it)
A billion lights tonight (come on and get it)We ignite the sky (come on and get it)
A billion lights tonight (come on and get it)
Flashing in your eyes (come on and get it)
A squad might start a fire (come on and get it)
A million miles an hour (come on and get it)

And they can't stop the power (come on and get it)We ignite the sky (come on and get it)
A billion lights tonight (come on and get it)
