

# Spinning Away

## Zack Walther Band

Up on a hill, as the day dissolves  
With my pencil turning moments into life  
One by one, all the stars appear  
As the great winds of the planet spiral in  
Spinning away, like the night sky  
In the million insect storm the constellations form  
On a hill, under a raven sky  
I have no idea exactly where I've been  
Some kind of change  
Some kind of spinning away  
With every single line  
Moving further out in time  
Spinning away, like the night sky  
(Some kind of spinning away)  
I have no idea exactly where I've been  
And it's here and there  
And here and there  
Some kind of spinning away  
And here and there  
Some kind of spinning away  
And here and there  
And here and there  
Some kind of spinning away  
And here and there  
And here and there  
And here and there
