

Most Of All

Fuel

I see our stars tonight
Do you recall that light
Or do you ever think of me
And in your world somewhere Do memories rip and tear
The ones that always keep you hangin on
To all that might have been
And I love you now And I hate you now
And I miss you most of all
All those times we laughed
The scars that you left Still I miss you most of all
And by the waters side
The tall grass where we lied
The nights we cried ourselves to sleep Most septembers now
I break down somehow
Rememberin all we said
And all those dreams we never got to see (chorus) Are you somewhere
Without a care
Or are you as alone as I am
Did you ever make it home
