

Human Technology Will Render You Obsolete

We Are Scientists

We were watching as the sun was slowly setting
We were talking like the world was at an end
You can laugh about it now
It won't matter anyhow when we're gone We were lost, and so our sun was slowly setting
We were hoping that the world was at an end
You can laugh about it now
It won't matter anyhow when we're gone Uh oh, uh oh, oh
You'll ask about us when we're gone
You'll ask about us when we're gone
We won't be liable for what happens then You can laugh about it now
You won't be laughing quite as loud when we're gone
