

Levitate

Hollywood Undead

[J-Dog:]

Can't stop I need some help.

Fuck you, I'm by myself

Is it a truth or lie?

It's what you can't deny.

'Cause it's the way you think

Mix with the pills and drink

Brought back to the way you are

Float up 'til you're close to God

You know that hiding ain't gonna keep you safe

Because the tears on your face

They leak and leave a trace

So just when you think that true love's begun

It goes off at any second just like a loaded gun[Danny:]

You know, I can take you straight to heaven if you let me...

You know I, I can make your body levitate if you let me...

You know that I can make your body levitate... le-levitate...

I can make your body levitate... le-levitate! (you know...)[J-3-T:]

Can't stop the feeling,

High as a ceiling

I got the money who's fuckin'dealin'

You feel the heat like a barrel of a gun

I forgot the last time I saw the sun

I've got this disease

It's digging deeper in me

It's like my mind is leaving,

But my heart keeps beating

So I'll paint the walls, red drip from the nose

But where it goes, nobody really knows

Hit the bottle and she's gonna to follow

I fall asleep there ain't no tomorrow

Gone too far, no one can save me

Who needs you when I've got my baby

My baby is beautiful she loves me true

But if she dies I hope I die too![Danny:]

You know, I can take you straight to heaven if you let me...

You know I, I can make your body levitate if you let me...

You know that I can make your body levitate... le-levitate...

I can make your body levitate... le-levitate! (you know...)[Charlie Scene:]

I put down another sack of them
Then it's straight back to the flask again
I can't help stop what's happening
On the wrong track, yeah, I'm back again
Up shit creek and I'm paddling
Blacked out room and I'm travelin'
Good ideas I'm lacking them
I'm too fucked up now I'm babbling
Wondering how to fix these damages
All these goddamn damages
Cover myself with bandages
From all these goddamn damages
Wondering how to fix all of these damages
All these goddamn damages
Cover myself with bandages
From all these goddamn damages[Danny:]
You know, I can take you straight to heaven if you let me...
You know I, I can make your body levitate if you let me...
You know that I can make your body levitate... le-levitate...
I can make your body levitate... le-levitate! (you know...)
