

A Night With You

Electric Valentine

All I wanted was just a night with you
A night with you baby
All I wanted was just a night with you
So don't keep me waiting Electric Valentine Just stay, we both know you want a little taste
And I just don't have the time to waste
A subtlety baby (a subtlety baby)
True, I'll stay if you ask me too
I'm not gonna lie to you
I really need a night with you, yeah All I wanted was just a night with you
A night with you baby
All I wanted was just a night with you
So don't keep me waiting [x2]
Don't keep me waiting Once more and I really like to hold you more
It's even better on my bathroom floor
If you know what I mean now
True, I'll stay if you ask me too
I'm not gonna lie to you
I really need a night with you, yeah All I wanted was just a night with you
A night with you baby
All I wanted was just a night with you
So don't keep me waiting [x2] You're exactly, you're exactly what I need [x3]
Like it really matters anyway [x2] All I wanted was just a night with you
A night with you baby
All I wanted was just a night with you
So don't keep me waiting [x4]
Don't keep me waiting
