Why Is a Raven Like a Writing Desk

The Acacia Strain

Combining the creative efforts that focused on the assassination attempts made upon all presidents - past and future - with the main ideals of capitalism and fears of environmental degeneration. The ozone depletion is a lie. A farce concocted by geniuses to cover up the tracks of wheels long set in motion. We are the seekers of sight. The sightseers seeing what no others have seen. Stop all production; dumb down and unlearn. Why lie, why deceive? corruption is easier when the corrupted are corrupt to relearn is death, but the dead have been walking the earth for years.
