Long Hallway With A Broken Light

Thriving Ivory

White lines that never fade
burned deep with everyday
then healed to know
you live here in a photograph
no sound and no regrets
and I need to know

hearts sink but never weak
you lay down alone but you don't mind
questions you never breathe
Your face on the wall that i can't shake

(Chorus)
I'm walking on air
close to you
through long hallway with a broken light
and I need to know I need to know
if your still alive

You hold me like a bag of bones
wrapped up and under ground
pull me out so I can feel
make me believe, that more night's not
a minute to long when a moment is all i need

(Chorus)
I'm walking on air
close to you
through a long hallway with a broken light and I
I need to know I need to know
if your still alive

You've blind the light
Dance with the pain but you don't mind
I see the city burn tonight
arms up in flames
would you carry me away

(Chorus)
and I'm walking on air

close to you, close to you
through a long hallway with a broken light and I
I need to know I need to know
I'm walking on air
close to you, close to you
through long hallway with a broken light and I
I need to know I need to know
If your still alive
