Everybody Needs Love

Bloodstone

Everybody needs some love
Need someone that they can trust
Someone they can love for life
Even when the times get rough, we can make it work
And we can find love if we try
We can fly high and touch the sky
Ah, yes we can, we can do it if we try
It's up to you and I, sing
Everybody, everybody is somebody who needs love
If you want it, you can get it, just trust and believe love
Wave your hands in the air, scream out
I need love, I need love
No one want to be alone
Lonely nights spent at home
Waiting by the phone, oh no
All we gonna do is trust, we can make it work
And we can find love if we try
We can fly high and touch the sky
Ah, yes we can, we can do it if we try
It's up to you and I, sing
Everybody, everybody is somebody who needs love
If you want it, you can get it, just trust and believe love
Wave your hands in the air, scream out
I need love, I need love
If you work hard every day
Let me hear you say I need love, need love
If you're sick and tired of being lonely
Let me hear you say I need love, need love
I know it's a lot of y'all out there
Who think you can't find love
But I'm here to tell you, if you want it, you can have it
Just believe that
Everybody, everybody is somebody who needs love
If you want it, you can get it, just trust and believe love
Wave your hands in the air, scream out
I need love, I need love
Everybody, everybody is somebody who needs love
If you want it, you can get it, just trust and believe love
Wave your hands in the air, scream out

I need love, I need love
