Heavensent

Konkhra

A hundred million miles from home
The only one left in the dark
Alone with everybody's thoughts
My only company the stars, the stars
Close your eyes, it's all pretend
Let them know your heavensent
And we all love, we all love
You and me we all like them
Search and find it's in your ways
And we all love, we all love
Heavensent, ooh
And we all love, we all love
See me window hungry eyes
And I just wanna see the world
The only once who hear this far
The stars
Close your eyes, it's all pretend
Let them know your heavensent

And we all love, we all love
You and me we all like them
Search and find it's in your ways
And we all love, we all love
Heavensent, ooh
And we all love, we all love
Close your eyes, it's all pretend
Let them know your heavensent
And we all love, we all love
You and me we all like them
Search and it's them in your ways
And we all love, we all love
Heavensent, ooh
And we all love, we all love
Heavensent, ooh
We all love, we all love
Heavensent
