# Morality

## Smog

I could kiss you
The sunlight coming through your blouse
Words wont tell me what your bodys all aboutI could take you
You could take me
With hands and hair and eyes and bones and
kneesBut hey
What would my wife say
What would my wife say
If I was marriedI could keep you
With money every month
Some city apartment where I
Where you will stayBut hey
What would my wife say
What would my wife say
If I was married
