## 10,000 Maniacs

Power, dizzy with it stumble  
Detail, a chance for us to quarrel  
Anger, my head is shaken violent  
If I could calm or restrain you For the sake of pity, save the pistol  
Save the cynics tongue  
Save the cool white stare  
And take me to an honest face sometime Amaze me now Trust is the greatest human error  
Empty, used me as a vessel  
Ruthless, you're not known for subtlety  
If I could calm or restrain you For the sake of pity, save the pistol  
Save the cynic's tongue  
Save the cool white stare  
Take me to an honest face sometime Amaze me now Artful, well there's quite a skill to torture  
A half smile, was it all you could deliver  
Token, so hard to be pleasant  
If you could calm or restrain it For the sake of pity, save the pistol  
Save the cynic's tongue  
Save the cool white stare  
And take me to an honest face sometime Amaze me now Amaze me now, now, now
