

10 Laws

East Forest

Always see the dangers first
Always protect your feet
Always be ready for cold
Always be ready for heat
Always know where good water or source is
Always master the skills necessary
Always get the job done
Always know your place
Always disallow foolishness
Always rest whenever you can

Ten fingers, ten laws that I live by
(Ten fingers, ten laws that I live by,
like all signs they keep me on track)

It could be that we're all musicians
just singing our way through life together
