Come Clean

Tristan Prettyman

Not the way you planned it
You didn't mean to happen
Could have been anyone
You should stop do what you started
Say goodbye and dearly parted
You're right back where you came fromCome clean when lines get blurry
Come clean when the dawn gets dirty
Holding your breath
When you just wanna scream
At some point we all have to
Come cleanPromises get broken
Details go unspoken
I never say too much
Spend too much time thinking
And the weeks lead up to leaving
Summer's gonna get crushedCome clean when lines get blurry
Come clean when the dawn gets dirty
Holding your breath
When you just wanna scream
At some point we all have to
Forgive the regrets
When it comes, let it pass
Let the first rain of the season
Wash away our past
I know, I know that we canCome clean
When the lines get blurry
Come clean
When the dawn gets dirty
It's easy to see,
Now that you can breathe
At some point we all have toCome clean
When lines get blurry
Come clean when the dawn gets dirty
Holding your breath
When you just wanna scream
At some point we all have to
At some point we all have to
Come clean, come clean
