

Come to Me

Dispatch

Cast a spell on me, don't shake my constellation
I'll be riding out all damn time
Man, I got so lost, such a cost
I let you down See the love shining down on you
Tell me things, all that we can do
Come to me, come to me, for you need it
Come to me, come to me, for you need it, for you need it Underneath it all I cast in my chips to win.
I thought I looked so steady,
baby I was ready
but I find I lost it See the luck shining down on you
Tell me things, all that we can do
Come to me, come to me, for you need it
Come to me, come to me, for you need it, for you need it
