

They Know Nothing About Us

Basia

Right from the start there was none
Who had faith in us
Who believed two of us had a chance
Many years, precious scars
We survived, we are stronger They don't know about us
They know nothing about us
They don't understand
They know nothing about us They don't know about us
They know nothing about us
No, nothing about us
They don't get our love They don't get our love Wish we could be somewhere else
Where they wish us well
Where the people are happy for us
Just imagine how far we could go
What we could do They don't know about us
They know nothing about us
They don't understand
They know nothing about us They don't know about us
They know nothing about us
No, nothing about us
They don't get our love They don't get our love Many years, precious scars
We survived, we are stronger They don't know about us
They know nothing about us
They don't understand
They know nothing about us They don't know about us
They know nothing about us
No, nothing about us
They don't get our love They don't know about us
They know nothing about us
They don't understand
They know nothing about us They don't know about us
They know nothing about us
No, nothing about us
They don't get our love They don't know about us
They know nothing about us
They don't understand
They know nothing about us They don't know about us
They know nothing about us
No, nothing about us

They don't get our love
