1989

Devlin

I remember when I was twelve years old No worries in my brain with a pound in my pocket

And a chest full of smoke

I remember all the chordies we droveWe used to play football all day

And use jumpers for goalposts

And throw egg yolks at windows

To wind up the old folksStarted learning about the birds and the bees

So there's birds from my class

On their knees behind treesMy favorite MC was Sharkey Major

Way before I hit one double O three

Temptation, Kiss 100 or Flava

Get off from school and take

Ninety two point threeBut let's skip forward in time

Seven years down the line

And it seems the spotlights on me

Sometimes I still wish

That I was still twelve or thirteenLife can pass you buy

Just watch how fast it flies

1989's when I started mine

Now I'm like what happened to the time? Life can pass you buy

Just watch how fast it flies

1989's when I started mine

Now I'm like what happened to the time?15, bag of weed, bag of beers in the park

Duckin' out from Feds in the dark

Then we appear with grass

Stains up and down my legs and arms

And with a fresh beer clenched in my palmMy bars are different class

I've been rolling with Dogz and Glamour

And Shotz for a year

I've been steppin' up fastI guess I got around in the bits

I was selling bags of bud

And Tales from the Crypt

I met Ghetts when I was 14, lost touchBy 16, I'd linked up with Ghetts again

Rolling with The Movement

And started doing sets for themMercston, Scorcher, Unique and Wretch and 'em

2006, I was 17 when I finished my first solo CD

But this time there's an album in the midstLife can pass you buy

Just watch how fast it flies

1989's when I started mine

Now I'm like what happened to the time?Life can pass you buy

Just watch how fast it flies

1989's when I started mine

Now I'm like what happened to the time? By the time I hit 17

I was the coldest younger on the scene

With bars you never heard and flow you never seen

Before I come around it was cock it and shootMC's being cocky and rude

Then I moved to some deep concepts in my tunes

Monitor my brain waves

Tell me if I'm crazed but I think the games changedAnd MC's are opening doors in the same ways

As I did when I was a kid, I reach radio waves

And now I'm paving the way for a fatal displayMight blaze in a haze till I'm dazed

Then wave a grenade in your face

17 with bars that I regulate and generate pace

I'm only scared of who my enemies faceLife can pass you buy

Just watch how fast it flies

1989's when I started mine

Now I'm like what happened to the time? Life can pass you buy

Just watch how fast it flies

1989's when I started mine

Now I'm like what happened to the time?19 Showing strength in the booth

Now it's time to prove what Devlin can do

From the very first time I ever crept on a tune

I've immensely improved, the attendance is dueOriginal spitter, not remnants of you

Swear I can see success in my view

Crazy what letters in a sentence can do

'Cause my lyrics are the

Only thing sending me through Kanye called me a gangster rapper

I'm not a gangster rapper

Devs, I just spit it real

You're an MC like C difficile I look skinny 'cause I keep on missing meals

I'll get cold like you know how frigid feels

No children, sticking them rigid still guess my life's fucked up

But I'm only nineteen

And I've got a lot of living stillLife can pass you buy

Just watch how fast it flies

1989's when I started mine

Now I'm like what happened to the time?Life can pass you buy

Just watch how fast it flies

1989's when I started mine

Now I'm like what happened to the time?
