

Music Is Better Than Words

Seth MacFarlane

When you get all set to go into your big love scene
The night must be right
The mood must be slow
The wine must be high
And the lights must be low
And I recommend some music in the background
For when you're fumbling for the right words to say...
You'll find that music will go a long way! Music is better than words
You break the spell when you start to speak
That technique is all wrong
Just forget about words and sing 'er a song
Music was made for romance
Love and a sweet song go hand in gloves
Every lover knows this
And the sweeter the song, the sweeter the kiss! When you're without love you cry
And your song is the blues
But when you've got love you're high
And your song is a gay refrain
A happy stray that seems amused Don't let the night go to waste
Lookin' for ways to say "I love you"
Take your cue from the birds
Music is better than words! Don't let the night go to waste
Lookin' for ways to say "I love you"
Take your cue from the birds
Music...
Music is better...
Music is better than words! -Submitted by Rufus Al M
