

# Stop Whining

## Lagwagon

Can't you see  
we the people can make the choices  
You and I must raise our voices  
To build a future where we belong  
Revoke oppression and right and wrong  
But do you vote or do you only complain  
Do you just carry on in vain  
As your economy crashes,  
your country goes to war  
The deficit  
Their answer to tax the poor  
But you may never know  
what you refuse to learn  
Do you work the system  
or do you get burned?  
Do you ignore your abilities  
or your intellect?  
Are you obse  
An easy out, you forget it all  
but it's the hardest path  
and you chase to follow  
You wouldn't speak for yourself  
and now you're spoken for  
This is something you can not ignore  
It's time  
for you to notice  
the things that die  
with no more lies  
You can't deny  
You're always high  
and you still bitch  
Makes me sick  
It makes me sick the way you always  
fuckin' bitch  
I remember a time when I thought it wasn't fair  
The scales of justice did impair  
but with no darkness  
theere would never be light  
there would never be light

Without injustice we'd never have a right
