

Hold Onto Me

[Kirsten Thien](#)

I know I've got my problems and it starts with me
She saw something inside that I can't see
I laid at night now she'll comfort me
Hold onto me, hold onto me I got a nervous habit and I drink too much
She said she hates her life and wants to change her ways
She wakes in the night and whispers oh so quiet Hold onto me, hold onto me
Don't you ever leave, don't you ever leave
I know I've got my problems and it's probably me So hold onto me, hold onto me I stay up too late and it hurts to
breathe
Said it's 4 A.M., girl go back to sleep
Sometimes at night I can hear her dream Come rescue me, come rescue me
Don't you ever leave, don't you ever leave
I know we got our problems and it's probably me
So hold onto me, hold onto me I'm a drifter spying an open sea
And I see my reflection staring right back at me
With no place to go and you're left all alone
There's no place like home Hold onto me, hold onto me
Just stay with me, just stay with me
I know we got our problems and you'll probably leave
So hold onto me, hold onto me I could never leave, I will never leave
So hold onto me, hold onto me
