

# Peace Dream

Ringo Starr

Last night I had a peace dream  
You know how real dreams can be  
The world was a better place  
For you and me, can't you see?

No need for war no more  
Better things we're fighting for  
No more hunger, no more pain  
I hope I have that dream again

Can you imagine all of this coming through?  
It's really up to all of us to do  
Just like John Lennon said in Amsterdam from his bed  
"One day the world will wake up to see the reality"

Last night I had a peace dream  
You know how real dreams can be  
The world was a better place  
For you and me, can't you see?

No need for war no more  
Better things we're fighting for  
No more hunger, no more pain  
I hope the dream comes true someday

So try to imagine  
If we give peace a chance  
All the world could be living in harmony  
One day our dream could be reality, reality

Last night I had a peace dream  
You know how real dreams can be  
The world was a better place  
For you and me

No need for war no more  
Better things we're fighting for  
No more hunger, no more pain  
We'll make our dream come true someday
