

# Science vs. Romance

[Rilo Kiley](#)

i used to think if i could realize i'd die  
then i would be a lot nicer  
used to believe in a lot more  
now i just see straight ahead that's not to say i don't have good times  
but as for my days  
i spend them waiting crash sites keep me up at night  
impact division it splits in two  
directly underneath you as for those things (as for those things)  
that act as markers in your life  
but in between (but in between)  
you can't remember  
and so it seems (and so it seems)  
that you've grown up and over me (up and over me)  
and these silly things (these sill things)  
i like to dwell on test sites keep me up at night  
chainlink and meters  
i talk to you  
it's cold out there  
but i'm telling you  
i'm lonely too facts versus romance  
you go and call yourself the boss  
but we're not robots inside a grid text versus romance  
you go and add it all you want  
still we're not robots inside a grid zeros and ones
