

# Let the Sun Set On Life Forever

## Primordial

Dawn's cold passion filters through the trees

    In darkness I showed you ecstasy

    In darkness I took you from this world

Light shall never fall upon your face againFrom spring I've waited for this winter's reap  
I've watched you pass autumn's twilight yearningNow with dawn I bring you eternal sleep

    And silence all forever mourning...Your blood looked so beautiful in the snow

        I cried like a child...

        All my life I waited for you

        And with dusk's onset... I lay with you...
