

Alive

The Green

Take a look at the pouring rain,
Last time it rained for forty days
Take a look at the sun that shines
Painting colors of ribbons in the sky
Take a look out your window
And take a look at how the green grass grows
I can feel it on the inside
I give thanks and praise to be alive

Together we can make some memories
And help love grow and live eternally
And spread this word over both land and sea
And help each other on this long hard journey

Ever since I was a young little boy
All I needed was my families and toys
And learning how to count from one to ten
I said my ABC's and do it all again
And I learned how to walk,
And I learned how to talk.
And I learned that love is what life costs
And it still amazes me when I look down at a keiki
And see all the things they learn from you and me

Together we can make some memories
And help love grow and live eternally
And spread this word over both land and sea
And help each other on this long hard journey

Together we can make some memories
And help love grow and live eternally
And spread this word over both land and sea
And help each other on this long hard journey

Show me the way, Teach me the part
Help me find a way back to your mind and your heart
Keep me alive and Ill keep you well
Share a little water from your bucket to my well.

Show me the way, Teach me the part

Help me find a way back to your mind and your heart
Keep me alive and I'll keep you well
Share a little water from your bucket to my well.

Together we can make some memories
And help love grow and live eternally
And spread this word over both land and sea
And help each other on this long hard journey

Together we can make some memories
And help love grow and live eternally
And spread this word over both land and sea
And help each other on this long hard journey

Show me the way teach me the part
Help me find a way back to your mind and your heart
Keep me alive and I'll keep you well
Share a little water from your bucket to my well.
