Turbo Effalunt (Elephant)

Orange Goblin

A million miles an hour, with an overloaded mind
Ridin' on an asteroid into a different space in time
Satellites of madness are building mushrooms in the sky
Through the magic universe, into the neon lightIt's a lonely ride
It's a lonely ride
It's a lonely rideFly on to a mountain like a rocket to my brain
Watch the turbo elephants go around the sun again
Catch the shooting star that's heading straight towards the door
Take it while I've got it 'cause you won't see me no moreIt's a lonely ride
It's a lonely ride
It's a lonely rideWoman, didn't I say I didn't want you in my head?
Oh woman, said, "I only wanted you to stay in my bed"'Cause maybe, if we stick together we'll find our own way home
'Cause oh baby, that's the best damn journey that I've ever knownIt's a lonely ride
It's a lonely ride
It's a lonely ride
