

# When We Kiss

## No Secrets

It was late one night and we had a fight  
And it seemed like nothing was going right  
Then you turned around and you walked right out the door  
Now it's not the first time, it's not the last  
I know all about your checkered past  
And we've played this game one thousand times before

(Chorus)

Do you remember the night I can see it so clear  
All the sweet little things that you sang in my ear  
There were promises made but I think you forgot what you said  
There's a real fine line between love and hate  
And I'm not the type to just sit and wait  
I've made up my mind I can't wait for you anymore•  
But when we kiss, it feels like this  
And when we touch, it means so much

So many days go by and I still want you so  
If it was up to me I'd never let you go  
You're the only true love in my life and I want you to know  
All this passion and pain I think I'm goin' insane  
We've got nothing to lose and so much to gain  
If you love me today, who's to say  
You might leave me again

(Chorus)
