Take It All Away

Red

You've stripped me down, the layers fall like rain
It's over now, just innocence and instinct still remain
You watched me while I slowly disappeared
I reached for you to save me, you were frozen in your fearTake it all away, take it all away
Take it all away, take it all awayCircling the pain inside my soul
I reached inside your silence to steal what you won't show
I tried to find the answers in my fears
But what was found is lost again as soon as it appearedTake it all away, take it all away
Take it all away, take it all awayI'm breaking, I can't do this on my own
Can you hear me screaming out?
Am I all alone?You take away, you take away
You take away, you take away
You take away, you take away
You take away, you take away
You take away, you take away
