

# Time

## Red Hot Chili Peppers

I was walking through a courtyard  
Without shoes and without regard  
Automatic catacomb  
Take me where I wanna go All around, all in phases  
It astounds and amazes  
Built to last and known to roam  
Touch me, Im a chromosome One time  
Fascinated by the face of time  
One time  
I got it to give but now Im gonna make some time Ultra fine and altruistic  
Cant I spy into the mystic?  
Systems down for infiltration  
Open mind free of frustration I was driving to a safe place  
And arriving as I retrace  
Yelling through a telescope  
Aimed it at the star of hope One time  
Fascinated by the face of time  
One time  
I got it to give but now Im gonna make some time All over the yonder  
The smell of blood and thunder are  
Connected by the lightening rod  
Giving the beauty to it  
Heaven knows how well I know you Ultra fine and altruistic  
Cant I spy into the mystic?  
Systems down for infiltration  
Open mind free of frustration All around, all in phases  
It astounds and amazes  
Built to last and known to roam  
Touch me Im a chromosome One time  
Fascinated by the face of time  
One time  
I got it to give but now Im gonna make some time All over the yonder  
The smell of blood and thunder are  
Connected by the lightening rod  
Giving the beauty to it  
Heaven knows how well I know you Time, time, time, time, time, time
