Electric Carve

1000mods

Bring the sun above my head
And everything looks fine
And i don't care if you don't care
And if the six is nine

Lost my grip and lost my sound
But everything is cool
The road, the wind, the ground,
the sea I'm everybody's fool

This is your chance - Now shove it
This is your chance - Now shove it
This is your chance - Now shove it
This is the place - We love it

Bring the sun above my head and let me do my thing
I got the golden ticket babeI'm carving with the wind
Lost my grip and lost my sound I live in no man's land
But i got my mojo working fine I kickflip in the sandï»¿
