Cinnamon & Lipstick

FM Static

We were young
We thought we were invincible
We probably made no sense at all
OhAnd we belonged
Wherever we wanted to be
No one could tell us anything
OhI'm not the type to stay cold in the winter
But I know we had something special, my dear
We all had our struggle but faith kept us strong
And we always knew we would end up right hereSometimes I wish we could go back
You remind me ofCinnamon and lipstick
And the summers that we kicked it
And the late nights that we stayed up
Singing our favorite songsIn my beat up old apartment
We were broke and we were starving
But it's nights like that
That we will never forget againWe were strong
We thought we had the ever-glow
It felt so irresistible
OhWe prolonged
That some day we would have to leave
No one could make us not believe
OhI'm not the type to stay cold in the winter
But I know we had something special, my dear
We all had our struggle but faith kept us strong
And we always knew we would end up right hereSometimes I wish we could go back
You remind me ofCinnamon and lipstick
And the summers that we kicked it
And the late nights that we stayed up
Singing our favorite songsIn my beat up old apartment
We were broke and we were starving
But it's nights like that
That we will never forget againI know that there's nothing better than this
But please know that in my heart you will be missed
All we can do is make new memories
We can still change the world if we believeSometimes I wish we could go back
You remind me ofCinnamon and lipstick
And the summers that we kicked it
And the late nights that we stayed up

Singing our favorite songsIn my beat up old apartment
We were broke and we were starving
But it's nights like that
That we will never forget againCinnamon and lipstick
And the summers that we kicked it
And the late nights that we stayed up
Singing our favorite songsIn my beat up old apartment
We were broke and we were starving
But it's nights like that
That we will never forget againWe will never forget again
