

Shine (feat. Chuck New)

Sam Padrul

Ooh yeah~

Ooh~ yeah yeah~

Alright Ooh~ and I know it's been done before
but we're gonna do it better, have em asking for more

This might not last so I'm gonna let it on in
If you don't it to end, then you got to let it begin

Don't think about it, leave it all behind

Tonight the grass is greener on the side

This could be the best night of our lives

So take a chance with me, come along for the ride Motivate your senses and simplify your mind

Simulate that feeling from another place and time

And we're gonna shine through rays of glory underneath the flashing lights

When the day becomes the night

Celebrate that moment cause it might not come again

You're in control and it doesn't feel like anything else I've ever known

Can't let it pass me by cause it makes me feel alive

When the day becomes the night No time to stop, gotta keep on moving
no consequences, concentrate on what you're doing

Just let it go and put the pedal down

You'll know the moment when we're breaking through the speed of sound

Can't turn back now, keep your eyes on me

I keep lookin at you, now tell me what you see

Don't have to worry cause I'm on your side

Just wait til the stars come out when the day becomes the night Motivate your senses and simplify your mind

Simulate that feeling from another place and time

And we're gonna shine through rays of glory underneath the flashing lights

When the day becomes the night

Celebrate that moment cause it might not come again

You're in control and it doesn't feel like anything else I've ever known

Can't let it pass me by cause it makes me feel alive

When the day becomes the night [We gonna shine] x2 Motivate your senses and simplify your mind

Simulate that feeling from another place and time

And we're gonna shine through rays of glory underneath the flashing lights

When the day becomes the night

Celebrate that moment cause it might not come again

You're in control and it doesn't feel like anything else I've ever known

Can't let it pass me by cause it makes me feel alive

When the day becomes the night
