

# You Got to Believe in Something

Jonathan Butler

People talk about the weather  
Like it's always gonna rain  
They say it's gettin' harder  
When's it ever gonna change?  
Should take a look at  
All the flowers in the field  
For none was stressed like this  
You got to believe in something  
You got to believe in something  
You got to believe  
All things work together for the good  
No matter what the cost  
No matter all things lost  
You got to believe  
You got to believe  
So much anger and confusion  
Can make you lose your way  
Forget the world around you  
Make stronger faith and pray  
Look at the birds up in the sky  
No, they don't read, no  
But soon they'll find a way to feed  
You got to believe in something  
(Believe in something)  
Got to believe in something  
(Believe in something)  
You got to believe  
All things work together for the good  
No matter what the cost  
No matter all things lost  
You got to believe  
You got to believe  
You got to believe in something  
(Believe in something)  
You got to believe in something  
(Believe in something)  
You got to believe  
All things work together for the good  
No matter what the cost

No matter all things lost  
You got to believe  
You got to believe  
You got to believe  
(Believe in something)  
You got to believe  
(Believe in something)  
All things work together for the good  
No matter what the cost  
No matter all things lost  
You got to believe  
You got to believe  
You got to believe in something  
You got to believe in something  
You got to believe  
All things work together for the good  
No matter what the cost  
No matter all things lost  
You got to believe  
You got to believe  
You got to believe in something  
You got to believe in something  
You got to believe  
All things work together for the good  
No matter what the cost  
No matter all things lost  
You got to believe  
You got to believe
