

Can't Stop Love

[Darin](#)

We stand here today, together as one
You brighten my days just like the sun
When everything around is like stormy weather
We always survive 'cause we're in this together
Whoever said that we could never hold on
Doesn't know I found my star
(Baby, you are my star)
And now I'm happy, I stood up for so long
Baby, this is where our story starts
I can't stop, can't stop this love
No matter what they say, I love you
I can't stop, can't stop, I love you
No matter what they say, I love you
They said this love was the impossible kind
But we were strong enough to fight for this life
I can't stop, can't stop this love
No matter what they say I love you
Now I'm carried away because I've opened arms
You're here to stay, deep in my heart
They said that we couldn't but we did make it work
And nothing could stop us, not even two different worlds
I can't stop, stop
No, I can't stop
I can't stop, stop
No, I can't stop
