

# Closer to the Sky

**Michael Franti**

I'm so very happy just to be here  
I'm so glad I'm finally in a psace with you  
People say that we should never do this  
But they don't, they don't wanna know the truth You can try, you can try  
To build a fortress in your mind  
Try to stack up all your things so high  
You can try, you can try  
To climb away from this life  
But it will only bring you closer to the sky People say that you should never come here  
Something bad is only gonna happen to you  
Better stay inside where we can see you  
If you don't we'll make sure that you're feeling blue You can try, you can try  
To build a fortress in your mind  
Try to stack up all your things so high  
You can try, you can try  
To climb away from this life  
But it will only bring you closer to the sky Some people think that life is worth living for tomorrow  
Some people think that life is worth living for today  
Some people think that life is worth nothing but sorrow  
Some people think that life is worth living day by day We can try, we can try  
To build a fortress in your mind  
Try to stack up all your things so high  
We can try, we can try  
To climb away from this life  
But it will only bring us closer to the sky
