

# Drift

## Astra

High in the silence it's getting louder from the place we used to be  
with the .fading is like .being dream to world  
the moving slowly to the voices in my head  
from the one waiting here  
I came to save your time  
'cause mine today from the one waiting here  
I came to save your time  
away  
Please show me the way to every motion  
please take us away so we can be here  
I came to save your time  
Please show me the way to every motion  
please take us away so we can be here  
Ahh
