

Blind World

Flybanger

When are we going to finally meet destruction
When are we gonna finally meet disorder
Pretend you're not blind and just see there's no more time
Try to make what will break
Just another fool in a blind world
Lived a lie with all the hype
Just another fool like the other ones
When are we going to finally meet destruction
When are we going to finally meet destruction
Pretend you're not blind and just see there's no more time
Try to make what will break
Just another fool in a blind world
Somewhere inside you tried to hide just another fool like the other ones just
like the other ones
