Feel

Zug Izland

I gave you everything, all I could give
It might not have been, the life you thought you'd live
I know it feels good, to have you by my side
Even though I know you could, just break my heart wide
I just have to ask you, one more time.
Did I make feel like number one?
Did I help you see like stars in the sun?
Did I make you feel like number one?
Did I make you feel like lifes just begun
It's like a puzzle, a piece that just fits
You never really needed to look for it
In your eyes I see my future and my past
And, I never really thought that we wouldn't last
I just have to ask you, one more.
Did I make you feel like number one?
Did I help you see like stars in the sun?
Did I make you feel like number one?

Did I make you feel like lifes just begun
The way I've seen, all the good times and the bad
Been waiting for the next part we never had
To the highest mountain, yeah I would climb
I just have to ask you, one more time.
Did I make you feel like number one?
Did I help you see like stars in the sun?
Did I make you feel like number one?
Did I make you feel like lifes just begun
Yeah, yeah! Did I make you feel like number one?
Did I help you see like stars in the sun? Yeah.
Did I make you feel like number one?
Did I make you feel like lifes just begun Yeah.
