Outerspace

Evan And Jaron

It's lonely here in outerspace
The nearest stars are miles away
But I believe, I'm on to something big
I've only come to not be found
To circle high above the ground
And watch everyone else for a change
Don't you ever wish you'd never
Don't you wonder if your face might shine
Without the pies of lies
I've arrived I'm doing well
Quite a view from the top
Though it is cold as hell
I've arrived and it's hard to tell
The bright lights from the starlights
And the canyons from the hills
To all the girls who wish to be
Immortalized in fantasy
I wrote this song for you and not for me
I'm the senator of a lonely state
Too far gone, I've sealed my fate
I'm so tired of bein' blown out with the cause
Don't you ever wish you'd met her
Don't you wonder if your face might shine
Without the pies of lies
I've arrived I'm doing well
Quite a view from the top
Though it is cold as hell
I've arrived and it's hard to tell
The bright lights from the starlights
And the canyons from the hills
I've arrived I'm doing well
Quite a view from the top
Though it is cold as hell
I've arrived and it's hard to tell
Ohh, the bright lights from the starlights
And the canyons from the hills
I've arrived I'm doing well
Quite a view from the top
Though it is cold as hell
