

# The Power Cosmic

## The Echoing Green

I've seen the nightfall turn to day  
With every single word You say  
An element of light I long to share  
Something cosmic's in the air There's a kind of mystery  
When the dark recites its elegy  
It's heavenly and I believe it  
When the morning comes to be  
The sun restores my hope to me  
Of eternity and I receive it I saw a stone get rolled away  
When the sun came up today  
An element of light I long to share  
Something cosmic's in the air
