

# Walk Upon The Water

## Jon Oliva's Pain

My friends and I took a walk today  
To a place we've been before  
We flipped around like a wild machine  
Till we stopped down by the store  
Someone said

Let's go for a walk upon the water  
Let's go for a stroll across the sea  
First one, follow me  
Amidst my thoughts didn't feel inclined  
To drift into the bay  
By now my friends, could see their minds  
As I watched them drift away, all singing

Final boarding time  
Now their souls are washed up  
Faith destroyed their minds  
Better get the Life inspector  
Bring along his mind director  
You know I'm innocent  
I just didn't expect their trip to last  
With the gale force that crossed their path  
I could see them sinking fast, still singing

Let's go for a walk upon the water  
Let's go for a stroll across the sea  
First one, follow me  
Amidst my thoughts didn't feel inclined  
To drift into the bay  
By now my friends, could see their minds  
As I watched them drift away, all singing

Final boarding time  
Now their souls are washed up  
Faith destroyed their minds  
Better get the Life inspector  
Bring along his mind director  
You know I'm innocent  
I just didn't expect their trip to last  
With the gale force that crossed their path

I could see them sinking fast, still singing

This tale of common sense will end on  
Please don't drink and drive  
Especially when you're driving friends  
Along the waterside, still singing

Let's go for a walk upon the water  
Let's go for a stroll across the sea  
First one, follow me  
Amidst my thoughts didn't feel inclined  
To drift into the bay  
By now my friends, could see their minds  
As I watched them drift away, all singing

Let's go for a walk upon the water  
Let's go for a stroll across the sea  
First one, follow me  
Amidst my thoughts didn't feel inclined  
To drift into the bay  
By now my friends, could see their minds  
As I watched them drift away, all singing  
Follow me, follow me, follow me

Let's go for a walk upon the water  
Let's go for a stroll across the sea  
First one, follow me  
Amidst my thoughts didn't feel inclined  
To drift into the bay  
By now my friends, could see their minds  
As I watched them drift away, all singing
