I Mostly Copy Other People

The Almost

So this is the time when
You be what you just wanna be
I always thought this would
Come oh so naturallyI'm gonna do just what you
Order me to do
So chase me, chase me
I'll run twelve circles around youI'll make this way worse than you knowAin't it a shame that they won't
Remember all of this?Let's get, let's get it goin'
Make a mess way worse than you know
We'll beat this town black and blue
With my quick and easy flowThey'll ask us where we came from
Where's the place that we blew in from
I wanna make them like us
I wanna make them worship usIt'll make you feel like you're in loveAin't it a shame that they won't
Remember all of this?
We're all just fakin' out with someone
Who tells us what we should missMore fake than you have ever been
More fake than you have ever
Spin, spin the truth get a chanceAin't it a shame that they won't
Remember all of this?
We're all just fakin' out with someone
Who tells us what we should missAin't it a shame that they won't
Remember all of this
We're all just fakin' out with someone
Who tells us what we should missSo tell me what to miss
So tell me what
