London Heart

Tenterhook

And if you're on a mission
I've got lots of ammunition
Make your move

And start another war

The candle wicks are burning and the tables won't stop turning
This is us
You've got a London heart

Cemented in the corners that we're fighting in
Refusing every white flag that's been thrown in

And you say stop then go
That's just us
That's our show
You were yes and I was no

And let's stay up all night
With fading hearts, fading light
Falling old, and out of time
Pack up the photo frames

Gripping onto walls that shake from all the fake applauds you make for me
My only memory
And fortune threw us up to greatness
And pulled us to disaster
All we can do
Is just enjoy

Cemented in the corners that we're fighting in
Refusing every white flag that's been thrown in

And you say stop then go
That's just us
That's our show
You were yes and I was no

And lets stay up all night

With fading hearts, fading light
Falling old and out of time
Pack up the photo frames

No
No
No

Start across tonight
Let's put out Londons lights
And in this moment
It's you and I
And oh, be my east and west
Take me in the worst and best
Forever dreaming of all we were

Then you say stop then go
That's just us
That's our show
You were yes, and I was no

And let's stay up all night
With fading hearts, fading light
Falling old, and out of time

Pack up the photo frames
