

Nuclear Skies

The Rods

You see it in black or see it in white?
You know it all, you fucking know it all
You put us in boxes like cute little foxes
We'll watch you fall
Stop before another dies
Stop before a lover dies in these nuclear skies
We love, who we love
Fixing my heart you've ripped it apart,
Your vicious aim, you state your claim
So bitter and scared
The future you starved out of moral shame
Stop before another dies
Holding on another's eyes diving into
You'll find me dancing with the light
Dancing with the light you'll find me
Find me dancing with the light
Dancing with the light you'll find me
In these nuclear skies with these nuclear lies
My message is clear
I've come here to smear and smudge the rules
I'll give you a chance
I'm counting to ten I'll tell you
When to stop before another dies
Holding on to all your lies, missing the truth
That we love who we love
Stop before a lover dies in these nuclear skies
Nuclear skies
You'll find me dancing with the light
Dancing with the light you'll find me
Find me dancing with the light
Dancing with the light you'll find me
Find me dancing with the light
Dancing with the light you'll find me
Find me dancing with the light
Dancing with the light you'll find me
My message is clear
I've come here to smear and smudge the rules
And prove you fools
My message is clear

I've come here to smear and smudge the rules
And prove you fools
